

# CHANGING THE WORLD ONE SUPPER AT A TIME

## OUR MISSION:

A new solution with an old-age approach. **Supper with a Scientist** aims to connect the community with scientists, in the spirit of unity and celebration - and to do it all over the joy of sharing food. To nurture new relationships, learn something interesting, and encourage dynamic, productive and open conversations about science.

## HOW TO BECOME INVOLVED:

- Are you a scientist, or know a scientist, who has a passion to share their knowledge with the community?
- Are you interested in hosting a dinner, together with a scientist, to encourage the spread of scientific knowledge and get to know your community members?
- Are you interested in science and want to learn something new from the expert themselves? Do you love food and a good conversation?

**If you answered yes to any of these questions – we would love to hear from you!**
